

	SUBJECT: PROBABILITY & STATISTICAL DATA ANALYSIS		
	ASSESSMENT: PROJECT 2 (INFERENTIAL STATISTICAL ANALYSIS)		
	SESSION: 2, 2025/2026	CODE: SECI 1143	WEEK: 9
	REPORT FORMATTING		

REPORT FORMAT

- Font: Times New Roman
- Font Size: 12
- Line Spacing: 1.15
- Layout: One column (normal report format)
- Report Length: 5–8 pages (excluding Appendix)

REPORT ORGANIZATION

1) Introduction or background

Explain the purpose of the study in your own words, why you were interested in the question and what you expected to see from the data.

2) Dataset

Description of the chosen dataset including parameters or variable to be measured and how you do the data pre-processing (if applicable). Also, explanation on why you choose the parameter/variables and possible outcome of the test based on your chosen variables

3) Data analysis

- Your report must include the following analyses:
 - Hypothesis Testing (One-Sample or Two-Sample Test)
 - Correlation Analysis
 - Regression Analysis
- Optional Analysis (**Choose at least ONE**)
 - Goodness of Fit Test
 - Chi-Square Test of Independence
- For each analysis:
 - Clearly define the variables used
 - State the objective of the test
 - Present the results and interpretation
 - Discuss the conclusion obtained from the analysis
- For Correlation and Regression analyses:
 - You **MUST** include scatter plot graph(s)
 - Interpret and discuss the relationship shown in the graph and statistical results

	SUBJECT: PROBABILITY & STATISTICAL DATA ANALYSIS		
	ASSESSMENT: PROJECT 2 (INFERENTIAL STATISTICAL ANALYSIS)		
	SESSION: 2, 2025/2026	CODE: SECI 1143	WEEK: 9
	REPORT FORMATTING		

4) Conclusion

What have you learned from all activities done in Project 2 (choosing dataset, pre-processing and analysis process, interpretation of finding, etc.) What is your best/interesting findings from your results?

5) Appendix

Sample of your original/raw dataset and your processed dataset (if applicable).

IMPORTANT NOTE

- **DO NOT** include R script code in the report.
- The R script must be submitted separately in the R script or text file.
